

## DIGITAL ASSET MANAGEMENT ORGANIZATIONAL PREPARATION, IMPLEMENTATION CONSULTING

Senior level consultant with 25+ years achieving results for growth-driven organizations. Creative, client-focused high performer creating order out of chaos and helping organizations get to their single source of truth. Skilled in the development of effective DAM strategies as well as foundational work supporting readiness for DAM implementations, including taxonomies and metadata, process flows and standards. Define requirements, counsel business leaders, engage stakeholders, assess and improve processes and workflows, coach teams, and analyze/manage digital assets. Also, quite experienced in marketing direction, integrated brand development, campaign strategy and execution, and a veteran in all facets of digital, social, and offline media and marketing communications. A former Walt Disney Imagineer possessing wide-ranging experience in multiple industries with demonstrable results in growth, profitability, and operational performance.

- ✓ Business Requirements and Current State Documentation
- ✓ Foundational Support for DAM Implementation Readiness
- ✓ Process and Workflow Development/Assessment/Refinement
- ✓ Pragmatic, Creative Consultant Focused on Exceeding Needs
- ✓ Future State Recommendations and Roadmaps
- ✓ Enterprise Digital Strategies
- ✓ Team Leadership and Guidance
- ✓ Proven Track Record of Driving Results

### CORE CONSULTING COMPETENCIES

**Ability to drive the dialogue to identify organizational problems and issues and help determine strategic, operational, and functional requirements for solutions.**

Skilled at current state analysis, future state modeling, use cases, and workflows.

**Serve as a perceptive collaborator for cross-functional teams/LOBs to elicit, analyze, communicate, and validate needs.**

Capable of evaluating information from multiple sources, reconciling conflicts, abstracting from lower-level information to a general understanding, and distinguishing requests from underlying needs.

**Fastidious attention to detail for DAM implementations/launches and foundational work including taxonomies and metadata schema, process flows, use cases, user profiles, standards, and governance.**

Experienced at creating documentation accessible to all stakeholders.

**Strong analyst, communicator, project manager and creative thinker.**

Problem-solver and consensus builder – a trusted resource.
